

Trust Services

We provide comprehensive trust services as part of our integrated estate and succession planning. So that your estate is secured sustainably and for generations to come.

HOW WE ASSIST YOU

Protecting and increasing personal wealth for oneself and the generations to come reflects taking responsibility. We show you how to optimally organise your estate in a trust structure that creates favourable conditions for wealth development and will benefit you and future generations.

We advise and accompany you from the initial analysis of your wealth and family situation to defining suitable trust instruments and finally assume the entire administration. Thanks to our extensive experience we always find the best solution.

YOUR ADVANTAGES

Professional advice is as important as an effective and goal-oriented implementation. Besides advising and handling the entire administration, we also assume the executive functions in trust structures, thus ensuring that the chosen solution is also implemented on a practical level.

As internationally-networked experts with longstanding experience we develop sustainable solutions for generations to come. So that you can look forward to the future, free from worries.
